## **Lightspeed Mobile, Launched; New Electronics Assembly and Repair Service that Makes 'House Calls'**

*Methuen, Massachusetts, USA* – Lightspeed Manufacturing's Rich Breault isn't merely content to have electronics assembly and repair business coming in the front door; he's happy to go after it as well, and even do the job on-site, like a doctor or handyman making house-calls. Breault, president of Lightspeed Mfg., a growing electronics assembly contract services provider in Methuen, has just launched Lightspeed Mobile to service electronics manufacturers in the New England area. Lightspeed Mobile consists of a van, trained assemblers and rework/repair technicians, and a lot of nice, new equipment. They'll travel wherever they are needed and work inside a customer's facility, for an hour, a day, or a week, or whatever is needed, when there is a need. Certainly, customers could kit, package, and transport the job to Breault's facility, but it's quicker, safer, and more cost-effective to bring Breault's people and specialized equipment right into a customer's facility and get the job done in their familiar environment.

“Whether it’s an assembly job, BGA rework, repair, or whatever, if it’s about electronic assembly, our trained specialists are ready to go on-site and take care of it” Breault says. “Lightspeed Mobile is equipped with whatever tools and materials the customer requires, and also whatever our specialists need to get the job done right and on time.”

“This is far preferable, for example, to hiring temps, whose skill sets are unknown and who may have to be trained for a specific task. Our operators are trained, skilled, and properly certified; they also work with electronic circuits every day. They’ll come in with the appropriate tools, ESD protective gear and everything else required and get the job done quickly, reliably, and cost-effectively. They’re using state-of-the-art equipment, from soldering and rework equipment to inspection.”

Lilghtspeed Manufacturing is a high quality provider of electronics manufacturing services in the New England region, founded and staffed by members of NETCO Automation, a company that was known for its expertise in BGA services and prototype development. Lightspeed Mfg. offers quick-turn BGA services including rework, reballing, inspection, ECOs and upgrades, for BGA, CGA,  $\mu$ BGA, and other similar component types.

For more information, contact Rich Breault, President, Lightspeed Mfg. Inc., 268 Hampstead Street, Methuen, Massachusetts 01844 USA, Tel. (978) 687-7676, Fax (978) 687-7636; Web Site: [www.lightspeedmfg.com](http://www.lightspeedmfg.com).
